Dhruv Basia

New Delhi, India | +91-7292083676 | basiadhruv@gmail.com | dhruvbasia | DhruvBasia

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, SQL, HTML, CSS
AI/ML & Data: NLP, LLMs, Scikit-learn, TensorFlow, Keras, OpenCV, CNNs, NLTK, Pandas, NumPy, Matplotlib
Web & Backend: React.js, Node.js, Vite, FastAPI, Firebase (Firestore, Auth), REST APIs
Tools & Other: Git, GitHub, Netlify, VS Code, Network Security & Vulnerability Assessment

EDUCATION

Guru Gobind Singh Indraprastha University (GGSIPU) — New Delhi, India
B.Tech in Artificial Intelligence & Data Science; CGPA: 8.45/10 — *2023 – 2027*

Nutan Vidya Mandir Sr. Sec. School — New Delhi, India
CBSE Class XII (PCM & Computer Science) — *Graduated: April 2022*

WORK EXPERIENCE

National Informatics Centre (NIC), Ministry of Home Affairs — New Delhi, India
Machine Learning Intern – On-site — *Jun 2026 – Aug 2026*
- Building ML pipelines for an AI-driven document intelligence platform: automated document classification, metadata extraction, and information retrieval for government workflows.
- Collaborating with NIC officials and a cross-functional intern team to design and present ML solutions aligned with government data-handling and security requirements.

IBM SkillsBuild Summer Program — Remote
AI Agent Architect Intern – Agentic AI & ML Track — *Jul 2025 – Aug 2025*
- Mastered ML architectures and Agentic AI frameworks through the intensive IBM SkillsBuild program.
- Simulated AI lifecycles on IBM cloud infrastructure, integrating responsible AI ethical frameworks.

Student Council, GGSIPU — On-site
Web Developer – Event Management & Registration System — *2026*
- Developed a centralized web-based event management system supporting registration, role selection (attendee, volunteer, stall), and payment workflows.
- Implemented enrollment-based data fetching to auto-populate student details, preventing data tampering and eliminating manual input errors.

PROJECTS

NeuroLoad AI: Cognitive Load Detection System | *Python, NLTK, Scikit-learn, FastAPI, React* — GitHub
- Engineered an NLP feature-extraction pipeline and trained an MLPClassifier on a custom-labeled dataset to classify text into Low/Medium/High cognitive load with high accuracy.
- Deployed a FastAPI-based REST API for real-time inference, integrated with a React frontend for live predictions.

Smart Green Commute Tracker | *React.js, Node.js, Firebase, Netlify, Google Gemini API* — GitHub
- Built a serverless, real-time web application to track and quantify personal carbon emissions, integrating a gamified leaderboard to drive sustainable commuting behavior.
- Engineered a secure API layer with Netlify Functions and an AI-driven eco-nudging system delivering personalized sustainability recommendations.

CodeInsight AI: Automated Code Review Assistant | *Python, FastAPI, OpenAI API, AST Parsing, React* — GitHub
- Developed an AI-powered code review system that analyzes source code using AST parsing and NLP techniques to detect bugs, inefficiencies, and security vulnerabilities in real time.
- Built a FastAPI backend integrated with LLM APIs to generate contextual feedback, code optimizations, and complexity analysis, achieving significant reduction in manual review time.

CERTIFICATIONS

Software Engineering Job Simulation – J.P. Morgan (Virtual) — Link

Cyber Gyan Virtual Internship Program – C-DAC (Ministry of Electronics and IT, Govt. of India) — Link

Samsung Innovation Campus – Artificial Intelligence Course (On-Campus) — Link

VOLUNTEERING & LEADERSHIP

Chairperson | *IEEE-USAR Student Branch*
- Led and scaled the IEEE student branch through technical events, workshops, and collaborations, boosting engagement.
- Oversaw technical, operations, and media teams, driving planning, sponsorship coordination, and large-scale events.
